

RUSHIT BODRA

Python Developer

Surat, India | +91-8160034453 | bodrarushit@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

High-performing **AI/ML Engineer** with expertise in building time-series forecasting models, deep learning architectures (PyTorch TCN/LSTM), and sub-2ms ML pipelines on large-scale datasets (**1.2M+ records**). Proficient in FastAPI, WebSockets, real-time tick streaming, Gaussian HMM regime detection, and deploying 24/7 autonomous daemons on Oracle Cloud VPS via GitHub Actions CI/CD workflows.

CORE COMPETENCIES

- **Programming & Frameworks:** Python, PyTorch, TensorFlow, Scikit-Learn, LightGBM, Pandas, NumPy, FastAPI, WebSockets, Asyncio
- **AI & Machine Learning:** Time-Series Analysis, TCN, Gaussian HMM, DRQN (LSTM), Feature Engineering, Reinforcement Learning, NLP
- **Tools & Platforms:** Git, GitHub Actions (CI/CD), Oracle Cloud VPS, Linux Systemd Daemons, SQLite, Streamlit, Power BI

PROFESSIONAL EXPERIENCE

Python Developer Intern (AIML) – Supernal Ventures Pvt. Ltd. | Feb 2026 – Jul 2026

- Processed high-frequency time-series datasets to train PyTorch TCN and LightGBM predictive models for sequence modeling, formulating domain-specific statistical features and optimizing rolling-window backtest evaluation metrics.

Data Analytics and Machine Learning – Infolabz IT Services Pvt. Ltd. (Remote) | Jul 2025 – Aug 2025

- Developed machine learning models in Python with data cleaning and feature engineering, creating interactive Power BI dashboards to visualize KPIs and support data-driven decision-making

TECHNICAL PROJECTS

AI-Based Algorithmic Trading System [GitHub Link](#)

- **Hybrid ML/RL Architecture:** Built an end-to-end hybrid system combining PyTorch TCN, LightGBM, Gaussian HMM, and DRQN (LSTM) across 1.2M+ records, engineering features like Hurst Exponents and Market Structure Shifts (MSS).
- **Low-Latency System Design:** Optimized dataset loading and API endpoints, reducing historical candle and signal marker caching latency to < 2ms using in-memory RAM data structures and non-blocking background workers.

Movie Recommendation System | [GitHub Link](#)

- Engineered a content-based recommendation engine using Python, Streamlit, and SQLite, utilizing TF-IDF and cosine similarity.

Sentiment Analysis (Amazon Reviews) | [GitHub Link](#)

- Built an NLP text classification pipeline using Python, TF-IDF vectorization, and sentiment classifiers to analyze customer feedback.

EDUCATION

Bachelor of Engineering in Computer Engineering

Ahmedabad Institute of Technology | CGPA: 7.56 / 10
